

ADB 142

ANGLED DEBURRING MACHINE

The tubes end deburring machine ADB102 works as an independent unit or connected to a Pedrazzoli Automatic Cutting Line. It features a fixed and a mobile deburring unit to adapt the machine to the tube length. Moreover thanks to the tilting heads it is possible to deburr

tube and sections with angled cuts of up to 45°. Maximum dimensions of the tube with orthogonal cut is $\varnothing 142$ mm. For square section normal cut maximum dimensions is 130x130 mm, for square section angled cut at 45° maximum dimensions are 100x100 mm.
