

MDB 102

DEBURRING MACHINE

MDB 102 automatically carries out the finishing of tube ends as a free standing unit or connected to cutting lines. Adjustment of work lengths, of horizontal and vertical position of brushes is easily carried out by means of very accessible hand wheels. In the automatic

version MBD 102 is complete with an automatic compensation system for brush wear while all adjustments can be controlled from deburring machine or directly from connected cutting line. Machine is available for various work lengths.
